

Product Specifications **9V**

Powerex Precharged MH-96VP230

Industry Standard Dimensions

Typical Characteristics

Specifications

Type:	Nickel-Metal Hydride (NiMH) Rechargeable Battery
Size:	9V
Nominal Voltage:	9.6 Volts
Rated Capacity¹:	230mAh
Minimum Capacity:	215mAh
Internal Impedance²:	~500mΩ
Weight:	~55.0 grams
Size:	26.5 (W) x 17.0 (D) x 48.5 (H) mm

Operating and Storage Temperatures

Charge:	0 - 40°C
Discharge:	-20 - 60°C
Storage:	-20 - 50°C (<30 days) -20 - 40°C (<90 days) -20 - 30°C (<365 days)
Humidity:	65 ± 20%

This data is subject to change. Performance information is typical. Please Contact Maha Energy for more information.

1. Based on a 0.2C rate discharge to 8.0 volts
2. Internal Impedance measured after discharge at end voltage of 8.0 volts
